## Chemical Inventory Management System CASE STUDY

### Modern Exterminating

**Industry:** Chemical - Pest Control

**Challenge:** *Managing hundred line items, protecting from employee theft*

**Solution:** *Applying Bar Cloud system to track assets and equipment*

**Benefits:** - accurate asset tracking  
- Time efficient  
- Quick return on investment by efficiently tracking consumable and extending asset life.

### About

*Modern Exterminating Company's mission is to guarantee high quality pest and termite control to the user.*

*"It has saved us tens of thousands of dollars on chemical inventory"*

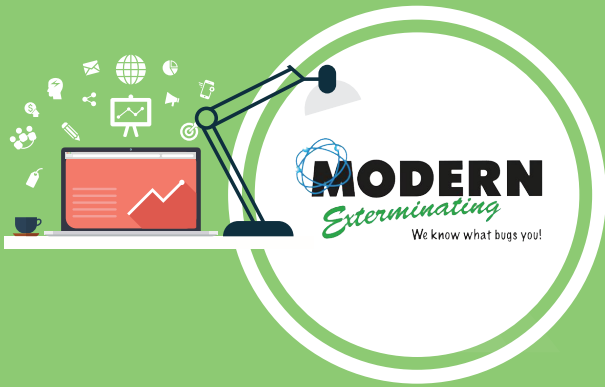

*Glenn Matthews*

### Summary:

Modern Exterminating, a pest control company founded by George Matthews, Sr. and Katherine Matthews, opened its doors for business on October 3rd 1955. Today, the company boasts 41 employees who have earned over 900 years of combined knowledge and experience in pest control. The company also enjoys over 11,000 customers. The products are built on a solid foundation used by leading experts in the field. In order to keep track of the vast array of equipment without compromising time and money, the company has adopted ASAP System's BarCloud system.

### The Challenge(s):

Modern Exterminating has an impressive supply of pesticides, equipment, materials and supplies. In order to manufacture and deliver its products in a timely fashion, Modern Exterminating requires the necessary raw materials to be readily available. An inventory management solution that tracks chemical usage across multiple technicians and departments is indispensable. Furthermore, the extensive quantity of assets and equipment are subject to possible shrink. Therefore, the company needs continuous tracking of stock, inventory and assets.

# Chemical Inventory Management System CASE STUDY

## The Solution

ASAP System's rose to the challenge and provided Modern Exterminating with a sound asset and inventory management system, BarCloud. BarCloud delivers easily accessible and accurate information preventing unnecessary expense on inventory stock. BarCloud saves money and time for Modern Exterminating allowing the company to further invest in its burgeoning business.

## Tangible Features

BarCloud replaced innumerable man hours counting inventory with immediate and accurate ordering data. Not only does the system save time on inventory tracking, but it also saves a significant amount of money on redundant inventory resulting in unnecessary, overstocked supplies. The savings in overstock and shrink make the BarCloud inventory system economical when considering its long term practicality and benefits.

## Additional Features

Modern Exterminating can also enjoy BarCloud's new stock receiving and ordering features. They have significantly improved the tracking and accountability of the company's inventory. "Time savings is a huge benefit", says Glenn Matthews, "we hope to continue using BarCloud long into the future".

## Ease of Use

According to Modern Exterminating, BarCloud is very easy to install and flexible to navigate. It takes mere minutes to import your existing inventory and familiarize yourself with the robust functionality and configurability of the software. BarCloud's ease of use was paramount to ensuring high adoption rates throughout the organization.

## OTHER CASE STUDIES

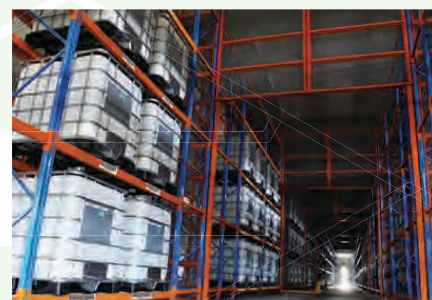

### Belmont School of Nursing

Track the location and use of hundreds of medical supplies at multiple storage and clinical simulation lab locations.

### Corfu Foods

Meet food quality and safety standards, including SQF requirements, by using Passport to track raw materials.

### East Kansas Chemical

Track the location and maintenance of tankers and bulk containers in compliance with EPA and DOT.
